

Canthacur / Beetle Juice

(Treatment & Side Effects)

- Areas that are treated will be covered with tape and/or bandaids and must be washed off with soap and water within _____ hour(s).
- The most common side effect is a blister that may become itchy, painful, and/or swollen; you may even notice small amounts of blood. A change of skin color around the treated area is also common.
- A very serious allergic reaction to this drug is unlikely, but if you notice any side effect not mentioned above, please contact your doctor or medical provider.
- For pain, your doctor or medical provider may recommend acetaminophen.
